REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

1. After a careful review of the invention and a meticulous search of the related prior art, the claims as presented avoid the prior art. The prior art discloses a multitude of vibratory belts, but it does not disclose the specific vibration mechanism as disclosed by the invention application. The prior art, such as Schein (2,980,109), disclose a machine comprising a base (88), a support (86), an action mechanism having two action members (82), and a message belt (72) wherein the action mechanism comprises two deceleration devices having an output shaft (32) and a crank/eccentrics (28) mounted in reverse and a driving source (26); however, Schein does not further disclose two displacement devices that change the rotary motion of the cranks into reciprocating linear motions that are opposite in direction which effectuates a rhythmic motion to the massage belt and thus the user.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Huang '876 discloses an exercise having a massage belt that includes a plurality of massage rollers (see Fig. 1).

Art Unit: 3764

Father discloses a vibratory massager having components (44) that are mounted in reverse to provide vibration to a massage belt (see Fig. 3).

Stoll '783 and '784 each disclose belt massage machines that are representative of the majority of belt massagers having a motor that drives eccentric components that vibrate a belt to provide a massage to the user.
